Attention: Duane D. Pearsall

Dear Duane

This will confirm our conversation of yesterday morning regarding your approval with certain temporary limitations from U.L. As I mentioned to you over the phone, we are evaluating at present the most recent Statitrol heads that have been received at Morton Grove. I expect to have an engineering report from our engineers doing this testing by the morning of July 10.

Some time during the week of July 10, Tom Bellinghausen and I will meet with our engineering people in Chicago to discuss any deviations from our engineering specifications which possibly occur in the present Statitrol self-switching head device. We will then plan on meeting with you in Denver on July 27 to discuss several items:

1. Product deviation from engineering specifications.
2. U.L. approval.
3. Production and Quality Control of the new product.

Duane, as our schedule becomes more firm, we will let you know when we will arrive, and who will arrive to meet with you in Denver.

Page Two

Since we have agreed that we should hold in abeyance any contact with Rimac Ltd. in Canada for at least a six month period, I will put a note in my follow-up file to discuss this with you approximately January 1, 1968.

Yours very truly

Robert L. Patton
